

PILING AND FOUNDATIONS

WHY IS PILING AN ESTIMATE?

Piling and foundation costs cannot be confirmed until all relevant plans and site conditions are known. This is because the final requirements depend on site-specific conditions and engineering specifications that may not be fully known at the time of quoting.

WHAT CAN AFFECT COSTS?

Costs may vary due to:

- ground conditions (e.g. soft soil, rock, or fill)
- pile length requirements
- engineering design changes
- council or compliance requirements
- access constraints

WHAT DOES THIS MEAN FOR YOU?

- Any pricing provided for piling is an estimate only
- **Final pricing is confirmed once all plans and specifications are received**
- Additional costs may apply if site conditions differ from expectations

OUR APPROACH

We aim to:

- provide realistic estimates based on available information
- notify you as early as possible of any changes
- keep variations transparent and reasonable
